EDUCATION

Universidad Iberoamericana del Desarrollo

B.Eng. in Software and Computer Systems Engineering

Mérida, Yucatán

2024 – Present

- Currently in the 6th term, focusing on information systems, structured programming, and differential equations.
- Pursuing Harvard University's CS50 certification (Introduction to Computer Science) — in progress.

EXPERIENCE

Cklass

General Associate → Sales Advisor, Motorcycle Department

Tapachula, Chiapas

Aug 2025 – Mar 2026

- Joined as a general associate, rotating through all of the company's operational processes.
- Promoted to the motorcycle department within the first month for outstanding customer service.
- Contributed to a notable increase in the motorcycle department's sales after joining the team.
- Designed and executed personalized follow-up with prospective customers, improving the sales close rate.
- Nominated for promotion to Area Manager after 5 months, recognized for leadership and results.
- Gained proficiency in the company's internal management systems and commercial software.

Little Caesars

Multi-functional Associate

Tapachula, Chiapas

Jan 2025 – May 2025

- Rotated across multiple operational positions, learning the chain's standards and processes.
- Assigned primarily as cashier for strong customer-service and interpersonal skills.

PROJECTS

SIGVI – Integrated Sales and Inventory Management System

2025

- Academic systems-analysis project based on real-world experience at Cklass.
- Identified operational inefficiencies in inventory and sales; proposed solutions using OCR, automated alerts, and dual barcode scanning.
- Produced complete system documentation, including requirements analysis and an implementation proposal.

Linux Terminal Password Generator

2025

- Command-line tool built in Python with a Linux-terminal aesthetic for secure password generation.
- Implemented customizable security criteria; developed and visualized in Neovim.
