ALEJANDRO ANZA CINTORA

Mérida, Yucatán, Mexico | alejandroanzacin@gmail.com
github.com/Alejandroanzac | linkedin.com/in/alejandro-anza-6483a2319

Education

Universidad Interamericana para el Desarrollo **Mérida, Yucatán**
B.Eng. in Software and Computer Systems Engineering *2024 – Present*

- Currently in the 7th term, doing my professional internship (estadías) at EFISYS.
- Pursuing Harvard University's CS50 certification (Introduction to Computer Science), currently in progress.

Experience

EFISYS **Mérida, Yucatán**
IT Documentation, Implementation Area *Aug 2026 – Present*

- Mexican software company for financial institutions (credit, savings and banking systems).
- Write and standardize the platform's user manuals, unifying style and navigation instructions.
- Internship project: simpler navigation guides built from the existing process flow diagrams, so customers find each screen faster.

Cklass **Tapachula, Chiapas**
General Associate → Sales Advisor, Motorcycle Department *Aug 2025 – Mar 2026*

- Promoted to the motorcycle department within the first month for outstanding customer service.
- Designed personalized follow-up with prospective customers, improving the sales close rate.
- Nominated for promotion to Area Manager after 5 months; daily use of the company's ERP and commercial software.

Little Caesars **Tapachula, Chiapas**
Multi-functional Associate *Jan 2025 – May 2025*

- Rotated across operational positions; assigned primarily as cashier for strong customer service.

Projects

ASTRON Fit: Training App with an AI Coach (TypeScript, React, Fastify, SQLite, MCP) *2026*

- Offline-first PWA (workouts, nutrition, Galaxy Watch data) self-hosted on Linux with systemd and Tailscale; 265 automated tests plus browser end-to-end tests.
- AI coach: a sandboxed Claude Code agent with no shell or file access that reads data through my own MCP server and only proposes changes as drafts I approve.

Pulso de Ventas: Sales and Finance Dashboard (Node.js, Fastify, Prisma, PostgreSQL) *2026*

- Product for small businesses: reads the sales Excel and reports by day, week, month and year, top products, expenses and net profit, across branches.

WhatsApp Chatbots (TypeScript, Cloudflare Workers, Durable Objects, D1, n8n) *2026*

- Contributed to a student-support bot: code review, a state-machine fix and a payment-request feature.
- Building multi-tenant bots for restaurant orders and clinic appointments, plus an n8n AI agent that books in Google Calendar.

Technical Skills

Programming: Python, C, JavaScript / TypeScript, SQL (SQL Server, PostgreSQL, SQLite), HTML / CSS
Web and Backend: Node.js (Fastify), React, Astro, Prisma, REST APIs, PWA and offline-first sync
Cloud and Infrastructure: Cloudflare Workers (D1, Durable Objects), Docker, Linux (systemd, Tailscale), Git
AI: AI agents with Claude Code and MCP, n8n automations, local LLMs with Ollama
Other: Testing (Vitest, Playwright), technical documentation, Windows Server and Active Directory, ERP
Certifications (in progress): Harvard CS50: Introduction to Computer Science
Languages: Spanish (native), English (basic–intermediate, actively developing)
